Video Conferencing Platform

ODAK Meet enables you to create and conduct secure online video conferences. ODAK Meet, which can be used by everyone, is suitable for use in different regions with its interface in different languages.

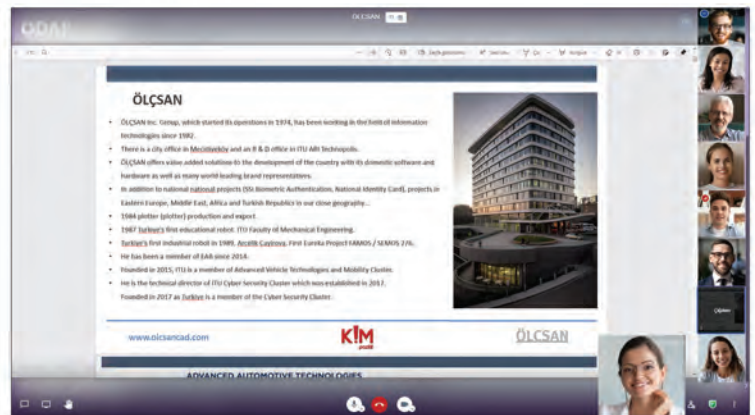

Audio-Video-Message

With the instant messaging application in video conferencing, it is possible to take the notes of the meeting. Sound and image are shared in good quality without any delay.

File sharing

The person who wishes in the meeting can share files on the screen. Without interfering voices, the meeting is held with sharing as if face to face.

Features

- Safe and fluid meeting with the team, even if you are in different regions provides the opportunity.
- Complies with privacy rules.
- With the lobby feature, attendance to the meeting can also be controlled in terms of timing.
- It can transmit the meeting invitation via different programs in a shortcut.
- The privacy level is increased with the feature of adding passwords to meetings.
- The feature of recording meetings.
- Live broadcast can be made from the meeting Youtube accounts or can be published on Youtube accounts at the end of the meeting.
- The multiple conference features.
- It covers multi-platform voice, video conferencing and instant messaging applications.
- It has the ability to generate and use secure keys on the basis of institutions, rooms and meetings.
- The delay time in audio and video transmission is almost non-existent.

Advantages

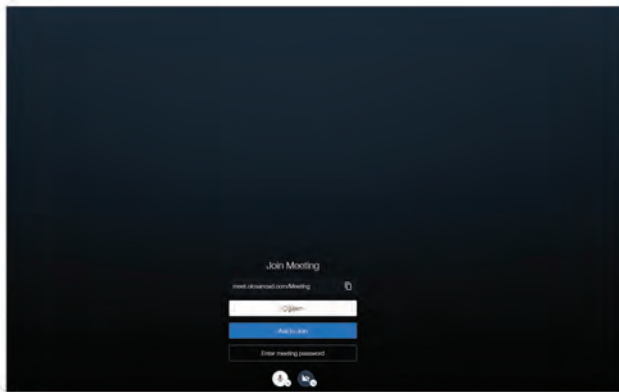

- Easy setup
- Quality sharing in audio and video
- MFA, Strong Authentication
- User-friendly WEB-based Graphic Interface, Modern Design

Meeting with “ODAK Meet” is now very easy!

Meetings are held safely and without any problems with ODAK Meet, which complies with the confidentiality rules.

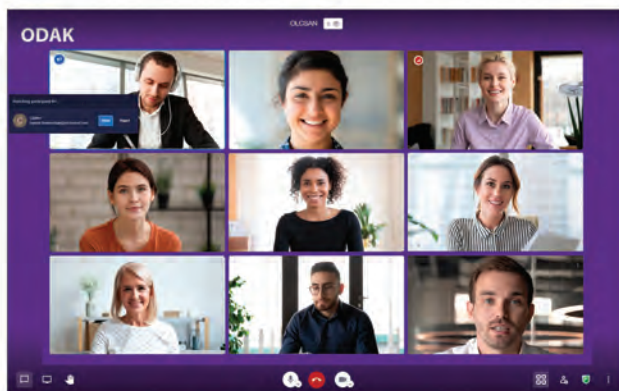

Meeting invitation

Meeting invitations are sent through ODAK Meet via other programs that work in integration, such as e-mail.

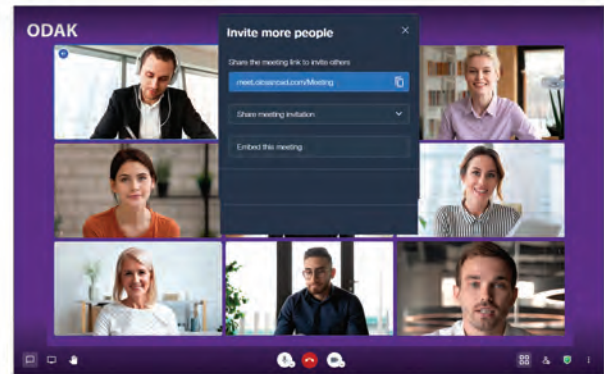

Lobby application

Participants invited to the meetings wait in the lobby before entering the meeting. Participation to the meeting is provided with the approval of the moderator.

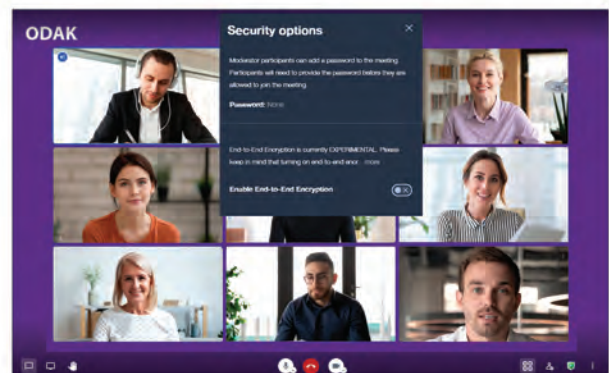

Platform user settings

Meeting recording is easily started on the platform. The meeting can be broadcast live on Youtube accounts, and its recording is shared on Youtube accounts.

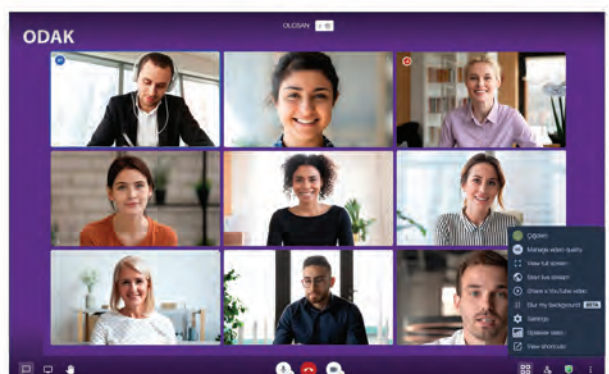

Password login to meeting

A password is determined by the moderator for the meetings and participants are entered into the lobby area with a password. Thus, privacy and security reach the highest level.

Login with moderator approval

When invited participants come to the lobby, a request is sent to the moderator. After the moderator accepts the participant, whom he sees with the person and e-mail information, the invitee attends the meeting.
