

SYNCDOG

Mobile Device Management (MDM)

Today, it's very important for enterprises to manage corporate devices used by team members on the organization's network to ensure the accuracy of identity and access management, control of inventory/distribution/utilization, as well as optimization of functionality and device security.

SyncDog offers a comprehensive mobile device management solution designed to enable your mobile workforce with the power of mobility, by enforcing password policies, jurisdictional control of access to approved applications, administration of device wipe functionality and more. SyncDog MDM is uniquely designed to easily build and administer role and entitlement-based groups to allow for easy set up varying policies to adhere to the specific needs of various user groups – down to the individual.

SyncDog offers the industry's first fully integrated Mobile Device Management solution to compliment our FIPS 140-2 Certified, AES 256-bit encrypted, end-to-end Trusted Mobile Workspace along with full Mobile Threat Detection – all managed withing a single, unified administration console. SyncDog's multi-platform MDM solution is compatible for all endpoints running on iOS, Android, Windows, and MacOS platforms.
